

HEAVY DUTY TRUCK REPAIR

HEAVY DUTY TRUCK REPAIR PRODUCTS

PLIOGRIP® by Valvoline now offers Heavy Duty Truck Repair Products in convenient, and cost-effective, 400ml and 600ml cartridge formats to better serve the heavy duty repair market. Use what the OEMs use.

SMC REPAIR SYSTEM

SMC Repair Adhesive forms the backbone of the PLIOGRIP by Valvoline SMC repair system and may be used as a saturating adhesive for backing patches, pyramid patches, or as a long work time SMC & fiberglass panel bonding adhesive. Finishing Cream, our award-winning skimcoat adhesive that sands like a putty but is flexible as any panel, completes the system. Finishing Cream may be used for minor cosmetic damage or a finishing coat for structural SMC repairs. Matting Adhesive is available for technicians that prefer a faster-curing saturation adhesive for backing patches.

SMC/FIBERGLASS PANEL BONDING SYSTEM

The PLIOGRIP 7700 urethane system has been approved by leading OEMs for panel replacement on SMC hoods for more than 10 years, and its PLIOGRIP OEM cousins are used in the factory on more than 90 percent of the SMC hoods on the road today.

- Choose Plastic Panel 3, Plastic Panel 10 or Plastic Panel 35 depending on the time you need for the repair. In either 400ml or 600ml formats, PLIOGRIP by Valvoline Plastic Panel products have the fastest room temperature cure time of any competitive SMC bonding product. And they are sandable.
- SMC Repair is an SMC & fiberglass panel bonding product in addition to being an excellent repair adhesive and may be used for plastic panel bonding applications requiring up to 60 minutes of work time.

Available at PBE jobbers carrying PLIOGRIP by Valvoline automotive repair system and select heavy-duty jobbers. Contact your jobber or a PLIOGRIP by Valvoline sales rep now. Use what the OEMs use.
